PLC Programmer

Position Description

The main duties of this position are to travel to customers' facilities to integrate/modify existing PLC program mainly using Allen Bradley components (PLCs and HMIs). Siemens and IEC61131 knowledge a plus but not required. Must be able to create and read logic and flow diagrams for program design, programming and testing. As a representative of our company you will be conducting your work in customer locations in the Americas. Some international travel required. Must have valid driver's license and passport. Travel is estimated up to 75% of the time and the ability to work remotely. This is a home based position.

Educational requirements will vary based on level of experience. Especially if the experience is in the Food Processing Industry. Must be a good communicator both orally and in writing as well as have a high level of organizational and problem solving skills. Must be proficient in CAD and Database systems related to controls and programming.

About Our Company

PPM Technologies, headquartered in Newberg, Oregon, and with offices in Sweden, Germany, the UK and Japan, is a market leader in the global food processing and packaging industry. With almost a century of experience and the continued release of innovative products, PPM Technologies enhances the performance of food processing lines. From snack foods to meat, seafood and poultry, our company provides advanced technologies to global food processors.

What We Offer

In addition to joining a company enjoying exciting growth, we also offer a competitive salary and excellent benefits, including a generous 401(k) plan.

Sincerely,

A handwritten signature in black ink, appearing to read "DSL".
